

RONIT PARMAR

Full-Stack Developer Intern

Ahmedabad, Gujarat, India | ronitparmar.work@gmail.com | +91 9265778781 | [GitHub](#) | [LinkedIn](#)
[Portfolio: ronit-parmar-portfolio.vercel.app](#) | [Live: MetroMind](#)

PROFESSIONAL SUMMARY

3rd-year B.Tech Information Technology student (CGPA 8.41) building complete web applications end to end — React.js interfaces on the front end, Node.js/Express and Django REST APIs on the back end, with MySQL/MongoDB and PostgreSQL for data persistence. Shipped a live, publicly deployed metro-ticketing platform (MetroMind) across a dual-backend, 3-tier architecture. Pairs full-stack coursework with 3+ years of freelance client delivery — ownership, clear communication, and deadline discipline. Seeking a Full-Stack Development Internship to build and ship production-grade features across the stack.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, Java, SQL
- **Frontend:** React.js, HTML5, CSS3, Vite, Responsive Web Design, Component-Based UI, DOM Manipulation
- **Backend:** Node.js, Express.js, REST API Design, Django REST Framework, Flask, 3-Tier Architecture
- **Databases:** MySQL, PostgreSQL, MongoDB, Schema Design, CRUD
- **Tools & Practices:** Git, GitHub, Vercel, Debugging, Cross-Browser Testing, CI-style deployment workflows
- **Data / ML (Familiarity):** Pandas, NumPy, scikit-learn

TECHNICAL PROJECTS

MetroMind — Intelligent Metro Ticketing Platform — *Live App, Full-Stack*

[React.js](#) · [Node.js/Express](#) · [Django REST](#) · [REST APIs](#) · [Vercel](#)

- Built the React.js frontend and integrated it with a dual-backend architecture (Node.js/Express + Django REST), applying 3-tier separation between presentation, business logic, and data layers.
- Diagnosed and resolved frontend rendering and state-management issues to keep behavior consistent across views for live test users.
- Deployed and maintained the live application on Vercel using a Git/GitHub-based version control workflow.

CinePulse — Movie Discovery & Watchlist Platform — *Full-Stack, Live App*

[TypeScript](#) · [JavaScript](#) · [Python](#) · [PostgreSQL](#) · [TMDB API](#)

- Built a full-stack movie discovery app with search, ratings, and watchlist features, backed by a PostgreSQL database.
- Integrated the TMDB REST API for live movie data and designed the schema to persist user watchlists and ratings.

MetroFlow — Metro Ticket Booking System — *Full-Stack*

[HTML](#) · [CSS](#) · [JavaScript](#) · [Flask](#) · [MySQL](#)

- Built the complete frontend and paired it with a Flask backend and MySQL database for a metro ticketing system.
- Implemented user authentication, digital wallet, QR ticket generation, monthly passes, and an admin analytics dashboard.

DigiKhata — Digital Business Ledger — *Python / Streamlit / SQLite*

- Built a Python-based digital ledger for SMEs with automated payment reminders, email alerts, and transaction reporting.

EXPERIENCE

Freelance Video Editor — *Self-employed, Remote* | 3+ Years

- Managed client projects end-to-end — translating requirements into deliverables, handling revisions, and meeting deadlines independently.
- Built client-facing communication, ownership, and time-management habits directly transferable to sprint-based development work.

ACHIEVEMENTS & CERTIFICATIONS

- 2nd Runner-Up, Prompt Craft — Lakshya 2.0 TechFest, L.D. College of Engineering (Apr 2026)
- Presented research at ICRAET 2026 on "Swarm Intelligence and Multi-Agent AI Systems for Autonomous Drone Coordination in Aerospace Applications"
- Introduction to HTML, CSS & JavaScript — IBM (Dec 2025)
- Advanced Relational Database and SQL — Coursera (Jun 2026)
- Exploratory Data Analysis for Machine Learning — IBM/Coursera (May 2026)
- Generative AI: Introduction and Applications — IBM (Jun 2026)
- Inheritance and Data Structures in Java — University of Pennsylvania/Coursera (Aug 2025)

EDUCATION

B.Tech, Information Technology Engineering — CGPA: 8.41 | Currently in 3rd Year

LJ Institute of Engineering and Technology (LJIET) / LJ University, Ahmedabad

Relevant Coursework: Full Stack Development, DBMS, Python & Data Science, Theory of Computation
